

A black and white photograph of a field of poppies. In the foreground, several poppies are in various stages of bloom and seed pod development. One large, fully bloomed flower is the central focus, with its petals showing some darker shading. To its left, another flower is partially visible. Below them, several seed pods (capsules) are attached to their stems, some still showing the remnants of the flower's base. The background is a soft-focus field of many more poppies, creating a sense of depth and a vast field. The overall mood is serene and contemplative.
